CompTIA®

Programs and Certifications

Logical Operations is a one-stop provider of CompTIA expert-facilitated training courseware, serving commercial training organizations, academic institutions, and governments/corporations with internal training programs. Our CompTIA product offering ensures training organizations have access to:

- Authorized, Recommended, and Official curriculum and product packages that meet all CompTIA Authorized Partner Program requirements
- Courseware most frequently recognized with 5.0/5.0 ratings from ProCert
- Courseware packaged with vouchers and coupons for discounted vouchers

Make the Logical CHOICE

Logical Operations offers CompTIA products through two lines of courseware products, called LO Select and CHOICE. LO Select offers training organizations select learning modalities for students, including traditional print courseware as well as supporting electronic components. CHOICE provides training organizations all the same features as LO Select, but adds a configurable content delivery platform that deploys additional electronic assets.
