

WHY GET LOGICAL OPERATIONS CERTIFIED?

1 EXAMS DEVELOPED BY LEARNING AND CERTIFICATION EXPERTS

- Logical Operations has been in the IT training industry for 30 years; our training products have helped hundreds of millions of individuals gain new skills and verify knowledge learned
- We have more experience than any technology company in validating IT knowledge and skills

2 VENDOR NEUTRAL CERTIFICATIONS FOR IN-DEMAND SKILLS AREAS

- Organizations use multiple technology vendors and have the flexibility to instantly change vendors – IT certifications need to meet these changing needs

3 CORE JOB TASK VALIDATION

- Certifications designed by vendors are frequently used by marketing departments as tools to promote the use of new features
- Logical Operations' certifications are practitioner driven, designed to validate core skills based on formal job task analyses

4 INDUSTRY ACCREDITATION

- Logical Operations certifications are designed to meet accreditation standards set by ProCert, the industry-leading exam accreditation organization
- CyberSec First Responder (CFR-210) was designed to meet ANSI/ISO 17024 compliance and apply to DoD Directive 8570 Analyst and Incident Responder job roles
