

# CYBER INSURANCE IS BOOMING!

**Don't miss out on offering training that helps organizations with their cybersecurity insurance**

## END USER CYBER AWARENESS TRAINING IS HERE!

"The Cybersecurity Insurance Market is growing 25% year over year" - Fortune Business Insights

Your customers are getting Cybersecurity Insurance and they need to be able to show they have activated End User Cyber Awareness training in their organization.

CyberSAFE can help you offer them an easy to digest 1 hour Cyber Awareness class that comes with a micro-credential and metrics reporting, and it just got easier than ever to execute.

**Offer CyberSAFE Today**

**Logical Operations can help you run CyberSAFE immediately with our "Get Them SAFE" program**

# GET THEM SAFE

We want to help you bring this important training to your clients with our "Get Them SAFE" offer. We know that adding new classes to your schedule and skilling up a trainer can be time consuming, so we're here to give you an assist in getting this program started.

# WE CAN TEACH IT FOR YOU

## Four 1-Hour Sessions

We will teach four 1-hour virtual sessions with as many students as you can put in each class. These sessions will cover the full course and prepare students to sit for the CyberSAFE microcredential.

## Courseware Included

We will include a digital copy of the CyberSAFE course materials for every student who attends.

## Microcredential Included

CyberSAFE features a microcredential that students receive after passing an online exam. This credential is valid for one year and demonstrates to their employer and their cyber security insurance that they are CyberSAFE.

# FOR JUST \$250...

The "GET THEM SAFE" Gives you everything you need to offer CYBERSAFE. You will receive an expert trainer, four 1-hour virtual training sessions, courseware and Access to the CyberSAFE microcredential. This is the best way to get started with our hottest and most important cybersecurity offering.
