Why Cloud?

DEMAND FOR CLOUD COMPUTING SKILLS IS SKYROCKETING

- Public cloud spending is expected to reach \$204.2 billion worldwide in 2016 (Gartner). The greatest ROI isn't always seen—optimization an opportunity but that knowledge is rare (RightScale).
- **#1 Cloud Challenge** for companies: Lack of resources/expertise (RightScale).
- Companies are paying salaries as high as **\$125,000** for new employees with cloud skills because talent is so scarce (NY Times).
- 90% of companies are planning to maintain or boost spending on cloud computing in 2016 (CIO.com).

Why Logical Operations and the NCTA?

Logical Operations is pleased to partner with the National Cloud Technologists Association (NCTA) to provide you with a cloud computing training solution that will enable IT professionals to gain the critical skills needed to successfully use and implement a wide range of cloud service technologies.

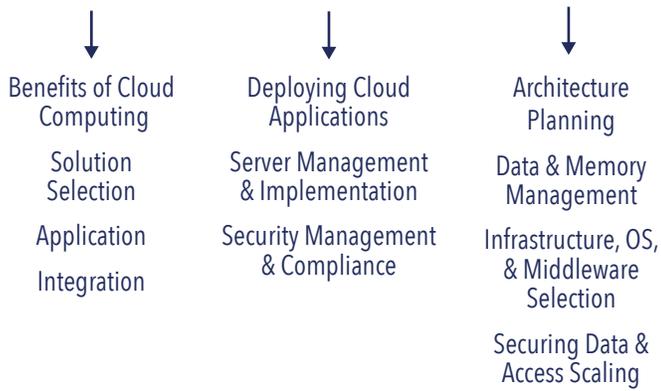

Unlike other cloud computing training available, our cloud computing curriculum is not vendor-specific; IT professionals will learn to manage cloud computing technologies from many different vendors, enabling them to be more successful on the job.

Program

3 CLOUD COURSES & EXAMS:

The three CloudMASTER® courses guide students through a wide expanse of cloud based technologies. Technologies covered include Microsoft Windows and Azure, Amazon, Web Services, VMware, Linux, Google Docs, Drupal, Wordpress, OpenStack, Rackspace, Digital Ocean, Chef, and Chef Solo.

TECHNOLOGIES — OPERATIONS — ARCHITECTURE

Outcome

1 CERTIFICATION: CloudMASTER®

- Take all three exams and qualify as a CloudMASTER®.
- Walk away not only with a certificate, but a **portfolio of skills** related to the most widely adopted public cloud services.
- Most organizations use **multiple** cloud services and vendors.
- Becoming a CloudMASTER® validates that you have the knowledge and skills required to use multiple cloud technologies, ensuring that you'll be more successful on the job.

Target Student

The CloudMASTER® courses are designed for IT professionals with basic IT knowledge and 2-4 years of IT industry experience or education. Experience with basic client and server deployment, configuration, and use is strongly recommended and achievable by taking the training and/or exam for CompTIA Network+ (Exam N10-006).
